

Crossroad Analytics LLC

Federal Financial Management Consulting · Veteran-Owned Small Business

"Federal financial management consulting, built on hands-on DoD experience."

CORE COMPETENCIES

- **Data Analytics & IT Systems Support** (NAICS 541512 · 541513 · 541519) — Power BI dashboard development, SQL/Python-based reporting automation, and on-site systems administration.
- **Accounting Support** (NAICS 541219) — financial analysis, reconciliation, and accounting support aligned to federal financial management and audit-preparation work.
- **Audit Readiness Support** (NAICS 541611) — documentation review, evidence package assembly, and process walkthroughs to help programs respond to auditor requests efficiently.
- **Internal Controls & Compliance** (NAICS 541618 · 541690) — control design, testing, and remediation support aligned to federal financial management standards.

DIFFERENTIATORS

- Direct access, not delegation — every engagement is led by an experienced practitioner you work with directly, not handed off to a rotating cast of junior staff you've never met.
- Audit-ready by design — documentation built the way an auditor will actually need it, not reconstructed after the fact.
- Right-sized engagements — scoped to exactly what a task order needs, nothing more, nothing less.

RELEVANT EXPERIENCE

Founder brings direct, hands-on experience in Army financial management operations, including work touching audit readiness, internal controls, and financial reporting — the same disciplines this firm now offers to federal agencies and prime contractors. Data analytics capability is reinforced by a Master's degree in Data Science from Indiana University (2026). Crossroad Analytics LLC is a newly formed entity; company past performance is still being established.
